

The background of the top section is a photograph of a large-scale renewable energy installation. In the foreground, rows of solar panels are laid out on a flat surface, reflecting the bright light of a low sun. In the background, several wind turbines are visible against a sky with soft, colorful clouds from a sunset or sunrise.

Liquid-Cooled Integrated Cabinet Energy Storage System

M125G261A

M125G261A is an newly developed C&I energy storage product for grid-connected application scenarios. The product highly integrates Li-FePO₄ battery, BMS, PCS, EMS, protection system, liquid cooling system. Innovative integrated design, small volume and large energy, provide customers with low-carbon and high-yield energy storage solutions.

High integration

- Highly integrated with energy storage unit, PCS, BMS, EMS, fire protection and temperature control systems.
- Covering an area of 1.35m² and a height of only 2.17m, leading in the industry

High safety

- Three-level protection system, accurately monitoring short circuit, over-current, over-voltage, over-temperature and other abnormalities.
- Three-level fire protection for module, cluster level and water protection, and two-level explosion-proof design for module and cabinet.

High efficiency

- PCS uses the third generation semiconductor silicon carbide solution.
- Intelligent liquid cooling temperature control strategy to reduce power consumption.
- System conversion efficiency up to 90%.

Intelligent management

- Built-in EMS, with the TOPBAND cloud platform to achieve remote monitoring, remote setting, revenue calculation, remote upgrade, data analysis, cloud warning and other functions.
- Mobile APP function and local web function, convenient on-site operation and maintenance.

About Ecosolex

As a sub-brand of Shenzhen Topband Co.,Ltd., Ecosolex delivers advanced solar, storage, and charging solutions for residential, commercial, and industrial use. Backed by Topband's decades of expertise, over 2,000 research professionals, and more than 3,200 patents, we provide reliable, safe, and sustainable energy systems. With 13 global production and R&D bases, Ecosolex empowers customers worldwide to achieve energy independence and contribute to a greener, more sustainable future.

Liquid Cooled Integrated Cabinet Energy Storage System

M125G261A

Model		M125G261A
System	Nominal capacity	314Ah
	Nominal energy	261kWh
	Usable energy	≥243kWh
	Nominal output power	125kW
	IP rating	IP55
	Operating temperature	-20~55°C
	Cooling mode	Liquid cooling
	Fire Protection	Aerosol
	Altitude	4000m(>2000m derate)
	Cycle life	≥8000 cycles
	Dimension(W*D*H)	1000*1350*2170mm
	Weight	≈2500kg
	Certification	GB/T36276,IEC/EN 62477-1,IEC/EN 61000-2/4,IEC62619,UN38.3,ROHS
AC (on-grid)	Nominal voltage	400V
	Nominal output current	180A
	AC access method	3L+N+PE
	Allowable voltage range	400V(-20%~+15%)
	Grid frequency range	50Hz/60Hz±2.5Hz
	Power factor	-0.99~+0.99
	Charge/discharge conversion time	<100ms
DC	Voltage range	728V, 949V
	DC Max. current	180A
	Rated DC power	125kW
	Battery type	Lithium iron phosphate (LiFePO4)
	PACK configuration	5*1P52S
Liquid Cooling System	Cooling capacity	5kW
	Rated circulating water flow	46.5@60kPaL/min
	Refrigerant	R134a
	Carrier refrigerant	Pure water, aqueous solution containing 50 per cent ethylene glycol
